Purpose For information

Supplier Webinar – Operational update on CfD and CM schemes

On 19 November 2020, [Low Carbon Contracts Company](#) (LCCC), the [Electricity Settlements Company](#) (ESC) and EMRS will be hosting a webinar for **Suppliers**, starting at 2:00pm.

The aim of this webinar is to provide an Operational update on the Contracts for Difference (CfD) and Capacity Market (CM) schemes. There will be an opportunity to ask our experts questions during and at the end of the webinar. This will allow us to engage with yourselves due to the lack of face-to-face opportunities this year in these challenging times.

Please advise any of your colleagues who would also be interested in attending this webinar. Further details and how to register are available on the LCCC's event page '[Supplier Webinar – Operational update on CfD and CM schemes](#)'.
