

# CIRCULAR

**TYPE & NUMBER** EMR Circular 234

**Date** 11 April 2022

**Purpose** For information

## Summer 2022 Baseload Market Reference Price

The Baseload Market Reference Price (BMRP) for the calculation season Summer 2022, which covers 1 April 2022 to 30 September 2022, is as follows:

Season	BMRP
Summer 2022	<b>168.25</b> £/MWh

This is now available on the [Settlement Data CfD Generators section](#) on the EMRS website.

### Who does this impact?

CfD Baseload Generators.

### How will the BMRP be used?

BMRP is used to calculate CfD payments to Baseload Generators for Baseload Difference Amounts. When the BMRP is below a pre-agreed £/MWh value (Strike Price), as set out in a CfD Generator's contract, top-up payments are made by [LCCC](#) to the CfD Generator to make up the difference between the BMRP and the Strike Price. When the BMRP is above the Strike Price, the CfD Generator pays [LCCC](#) the difference

### How is the BMRP calculated?

EMRS calculates the BMRP on behalf of LCCC. The BMRP is published on a seasonal basis in accordance with the [Contract for Difference Standard Terms and Conditions](#). It is calculated using volume weighted average prices based on Baseload Forward Season Contracts reported by [LEBA](#).

BMRP for Winter 2022 will be published in October 2022.

### What are previous BMRP values?

The BMRP for the Winter 2021 season to 31 March 2022 was **102.45 £/MWh**. For further historical BMRP values, please go to [Settlement Data CfD Generators section](#) on the EMRS website.
