## EMR Interfaces Workshop

This EMR Circular informs you we are hosting an EMR Interfaces Workshop to discuss and agree what data should be included in reports sent to Suppliers, CfD Generators and Capacity Providers over the Data Transfer Service (DTS).

### Background Information

ELEXON is going to be the EMR Settlement Services Provider, and it's been agreed that the EMR settlement system will send data flows over the DTS to those parties who want to receive them via this method (with an email-based backup for those that don't use the DTS).

On 28 April 2014 ELEXON published the consultation responses it received to the EMR Data Flows consultation, this is available [here](#). The consultation requested views on the mechanisms the EMR settlement system should support for exchanging data with market participants.

### What will the event cover?

The primary aim of the event is to discuss and agree what data should be included in reports sent to Suppliers, CfD Generators and Capacity Providers over the DTS. This is intended to assist MRA Parties in raising Change Proposals to add these data flows to the Data Transfer Catalogue (which defines the structure of all flows sent over the DTS). The event will also be useful to parties who are not intending to use the DTS, as the data content of reports will be the same regardless of which mechanism is used to receive the reports.

Reports to be discussed include:

- Supplier Obligation invoices (and associated backing notes) sent to Suppliers
- Billing Statements sent to CfD Generators
- Credit notes and invoices sent to Capacity Providers
- Notices sent to party when additional collateral is required
