Purpose For Information

Decision on MRA Change Proposal (DTC CP 3440) for EMR deferred until 8 October

The MRA Development Board (MDB) at its September meeting (25 September) deferred its decision on the proposed new Data Transfer Catalogue (DTC) flows for distribution of invoice backing data and other EMR-related reports until **Wednesday 8 October 2014**.

Why has it been deferred?

A number of improvements to the original change proposal were suggested by ELEXON, SSE Energy Supply and EDF Energy. Rather than approve the proposal with the amendments, or the original proposal without the amendments, MDB decided to re-issue the change proposal with the amendments for a further impact assessment. This would allow participants to be consulted on the amendments, and the original proposal and the improvements to be approved at the same time, rather than having a second release with additional items.

How does this impact the implementation date for the changes?

This delay for consultation should not affect the proposed February 2015 implementation date.

What happens next?

- ELEXON to raise a new change proposal including all the improvements to the original proposal by Monday 29 September. This new change will have a February 2015 implementation date;
- MRASCo to issue the new change proposal for short impact assessment (less than the usual minimum of 10 days);
- Both the original and amended change proposals will be presented as alternatives for decision at the MDB meeting on 8 October.

What is MRA DTC Change Proposal 3440 implementing?

Change Proposal 3440 proposes to implement five new DTC data flows that the EMR Settlement Services Provider will use to provide Suppliers, CfD Generator and Capacity Providers key EMR settlement information over the Data Transfer Network.

The new five data flows are as follows:

- CfD Supplier Invoice Backing Data
- CM Supplier Invoice Backing Data
- CfD Supplier Credit Cover Report
- CfD Generator Invoice Backing Data
- Capacity Provider Invoice Backing Data

CIRCULAR

Where can I locate the MRA Change Proposal 3440?

The original MRA Change Proposal is [available here](#) on the MRASCo website.

How else can the EMR Settlement Services Provider interface with Suppliers, CfD Generator and Capacity Providers?

For those participants who do not wish to use the DTN to receive the data provided in the five new DTC flows, two alternative options are available:

- Emails with attachments
- Download files via a Portal

All notices and invoices will be encrypted PDF files attached to emails. We will confirm the format of these options soon.

Where can I get more information?

Find out more about our role in EMR on the [EMR Settlement website](#). If you have any further questions about this Circular, please email contact@emrsettlement.co.uk.
