Purpose For Information

MRA Change Proposals Approved for Implementation

This circular informs **Suppliers** and **Capacity Providers** that the MRA Development Board at its [May meeting](#) approved the following three DTC Change Proposals, related to Electricity Market Reform data flows, to be implemented on **23 February 2017**.

Change Proposal	Who this Impacts	High level details
DTC CP 3488 - Enhanced Invoice Backing Data for CM Suppliers	Suppliers	This adds additional data items to D0364 (CM Supplier Invoice Backing Data) to allow for more comprehensive reporting to Suppliers of the data used to calculate their Capacity Market charges related to a Delivery Year.
DTC CP 3489 - Removal of unused data group from D0366 Data Flow	Capacity Providers	This removes the 'CM Outstanding Amount' (941) data group from the D0366 data flow (Capacity Provider Invoice Backing Data) as it is no longer needed.
DTC CP 3490 - Enhanced Invoice Backing Data for Capacity Providers	Capacity Providers	This adds additional data items to D0366 (Capacity Provider Invoice Backing Data) data flow to allow for more comprehensive reporting to Capacity Providers.

These changes will also be reflected in the backing data which is emailed to Suppliers and Capacity Providers (in CSV format) alongside their invoices or credit notes and will have the same implementation date. More information on each change is detailed in [EMR Circular 82](#).

Further potential change

EMRS will shortly look to raise a change to amend the description of data item '[CFD Mutualisation Type' \(J2056\)](#)', which is used in data flow D0362 ([CFD Supplier Invoice Backing Data](#)). This change is needed to align the data item with regulation changes introduced by [Electricity Supplier Payments \(Amendment\) Regulations 2016](#). This will change will be of interest to **Suppliers**.

EMR DTC Changes due to be implemented soon

[DTC CP 3482 \(Clarification of EMR Invoice Numbers\)](#) is due to be implemented on **30 June 2016**. This change will be of interest to **Suppliers, CFD Generators** and **Capacity Providers**. It amends the description of EMR Invoice Number Data Item (J9150) to clarify that EMR Invoice Numbers are unique within either Contracts for Difference (CFD) or Capacity Market (CM), but not across EMR as a whole. This change will assist recipients of EMR backing data in validating their EMR invoice numbers. For more information, please see circular [EMRC75](#).

CIRCULAR

Where can I get more information?

More information about these changes is available on the [MARSCo Website](#). If you have any further questions about this Circular, please email contact@emrsettlement.co.uk.
