

CIRCULAR

TYPE & NUMBER EMR Circular 155

Date 9 April 2018

Purpose For information

Summer 2018 Baseload Market Reference Price published

The Baseload Market Reference Price (BMRP) for the calculation season Summer 2018, which covers April 2018 to September 2018, is as follows:

Season	BMRP
Summer 2018	44.03 £/MWh

This is now available on the [Settlement Data](#) page of the EMRS website.

Who does this impact?

CFD Baseload Generators.

How will the BMRP be used?

BMRP is used to calculate CFD payments for Baseload Generators, Baseload Difference Amounts. When the BMRP is below a pre-agreed £/MWh value (Strike Price), as set out in a CFD Generator's contract, top-up payments are made by [Low Carbon Contracts Company](#) (LCCC) to the CFD Generator to make up the difference between the BMRP and the Strike Price. When the BMRP is above the Strike Price, the CFD Generator pays LCCC the difference.

How is the BMRP calculated?

EMRS calculates the BMRP on behalf of LCCC. The BMRP is calculated on a seasonal basis in accordance with the [Contract for Difference Standard Terms and Conditions](#). BMRP for Winter 2018 will be published in October 2018. The BMRP is calculated using volume weighted average prices based on Baseload Forward Season Contracts reported by [LEBA](#).
