

CIRCULAR

TYPE & NUMBER EMR Circular 188

Date 01 October 2019

Purpose For information

Delivery Body DSR component reallocation guidance published

EMRS, on behalf of the [Electricity Settlements Company](#) (ESC), would like to inform **Capacity Providers** that following the statutory consultation, held from March to May 2018, on amendments to the Capacity Market Rules 2018, the Delivery Body has published a **DSR component reallocation guidance**, which incorporates the feedback received from Capacity Market participants, prospective participants and other interested parties during the consultation.

This guidance advises DSR providers how to add and remove components during a Delivery Year and complements the changes to the Metering Aggregation process delivered during July 2019.

This updated guidance was published as part of the **Decision on the statutory consultation on amendments to the Capacity Market Rules 2018** and now reflected in [Annex D - Proposed amendments to the Capacity Market Rules 2019](#).

The DSR component reallocation guidance can be found on the [National Grid EMR](#) website.

Where can I get more information?
