

CIRCULAR

TYPE & NUMBER EMR Circular 189

Date 9 October 2019

Purpose For Information

Winter 2019 Baseload Market Reference Price

The Baseload Market Reference Price (BMRP) for the Calculation Season winter 2019, which covers October 2019 to March 2020, is as follows:

Season	BMRP
Winter 2019	£55.98/MWh

This is now available on the [Settlement Data](#) page of the EMRS website.

Who does this impact?

CFD Baseload Generators.

How will the BMRP be used?

BMRP is used to calculate CFD payments for Baseload Generators, Baseload Difference Amounts. When the BMRP is below a pre-agreed £/MWh value (Strike Price), as set out in a CFD Generator's contract, top-up payments are made by [Low Carbon Contracts Company](#) (LCCC) to the CFD Generator to make up the difference between the BMRP and the Strike Price. When the BMRP is above the Strike Price, the CFD Generator pays LCCC the difference.

How is the BMRP calculated?

EMRS calculates the BMRP on behalf of LCCC. The BMRP is calculated on a seasonal basis in accordance with the [Contract for Difference Standard Terms and Conditions](#). The BMRP for Summer 2020 will be published in April 2020. The BMRP is calculated using volume weighted average prices based on Baseload Forward Season Contracts reported by [LEBA](#).

What are previous BMRP values?

The BMRP for the Summer 2019 season to September 2019 was £53.79/MWh. For further historical BMRP values, please go to [Settlement Data](#).
