Change Amendment Record

Version	Date	Description
1.0	23 August 2016	Go Live Version
2.0	07 March 2017	Update to accommodate change in Payment Terms from 3 to 5 Working Days
3.0	04 August 2017	Document transfer into new template and cosmetic changes
4.0	24 October 2017	Housekeeping changes
5.0	01 March 2018	Capacity Market Supplier Charging using Gross Demand data

1. Introduction

This guidance document details how the Capacity Market (CM) scheme mitigates risk of a funding shortfall through the provision of Credit Cover and how this Credit Cover is managed by Electricity Market Reform (EMR) Settlement Ltd (EMRS) on behalf of the Electricity Settlement Company (ESC).

2. Purpose

The purpose of this document is to answer the following questions:

- Why must Credit Cover be lodged?
- What is the Credit Cover used for and when is it used?
- Who must lodge Credit Cover?
- How much and what type of Credit Cover is required?
- What happens if I do not provide enough Credit Cover?
- When does a new Supplier need to lodge Credit Cover?
- What if I have provided too much Credit Cover?

3. Who is this document for?

This guidance is relevant for all Suppliers; however, it refers only to Supplier Credit Cover obligations under the CM scheme. Credit Cover requirements for Suppliers under the CFD and for other EMR Parties will be described in alternative documents¹.

4. Associated Documents

This document should be read in conjunction with:

- EMRS Working Practice WP45 – Supplier CM Credit Cover
- EMRS Working Practice WP41 – Late Payment Procedure

5. Why must Credit Cover be lodged?

Suppliers are required to lodge Credit Cover² with ESC so that they are in a position to cover their CM Supplier Charge for one month in the event of payment default. This mitigates the risk of non-payment of charges to the Capacity Providers during a Delivery Year³.

6. What is the Credit Cover used for and when is it used?

Credit Cover can be drawn down if a Supplier fails to pay invoices relating to certain payment types issued by EMRS, on behalf of ESC. Credit Cover can be used for non-payment of Monthly CM Supplier Charges, Mutualisation, Reconciliation Payments and interest owed on these payments but excludes the Settlement Costs Levy (SCL). Draw down can also occur if the bank ratings on a Letter of Credit issuer have decreased below the specified level and the Supplier has not taken corrective action.

² The Electricity Capacity (Supplier Payment etc.) Regulations 2014 (28) and all subsequent amendments - <http://www.legislation.gov.uk/uksi/2014/3354/regulation/28/made>

³ The Electricity Capacity (Supplier Payment etc.) Regulations 2014 (28) <http://www.legislation.gov.uk/uksi/2014/3354/note/made>

Where Credit Cover cannot be used, alternative escalating actions will be taken to encourage Suppliers to meet their obligations⁴.

7. Who must lodge Credit Cover?

All Suppliers who are making monthly CM Supplier Charge payments must also lodge sufficient valid Credit Cover to meet their minimum calculated requirement.

This obligation is separate to any other Credit Cover obligations that Suppliers may face (such as under the Contracts for Difference (CFD) or Balancing and Settlement Code (BSC)) and any Credit Cover lodged through this obligation will be treated independently of other requirements.

8. How much and what type of Credit Cover is required?

The minimum amount of Credit Cover required is 110% of the monthly CM Supplier Charge.

EMRS will calculate the monthly Credit Cover amounts required, using the forecast of demand during the Period of High Demand⁵ (Peak Demand) provided by Suppliers on or before 1 June prior to the start of a Delivery Year. We will issue a schedule of Credit Cover requirements to each Supplier by the end of July. Suppliers must have sufficient Credit Cover in place prior to the start of each month during the Delivery Year. The required monthly amounts will be revised (for the months May – September) once actual metered data is received for the Peak Period, at which point EMRS will issue a revised schedule of requirements to each Supplier which they must then comply with. The revised schedule will be issued as soon as is reasonably practical which is expected to be in late March.

i – Peak Demand is calculated based on demand between 4pm and 7pm on Working Days over winter.

Credit Cover can be provided as either cash or a Letter of Credit⁶. Further details on how to lodge Credit Cover can be found in WP45 – Supplier CM Credit Cover⁷.

Whilst the scheme allows Suppliers the flexibility to manage their Credit Cover position on a monthly basis, Suppliers may find it more convenient to simply lodge their maximum Credit Cover requirement for longer periods. This amount can be derived from the schedule of payments (and the revised version) issued by EMRS.

9. What happens if a Supplier doesn't provide enough Credit Cover?

Suppliers are expected to lodge sufficient Credit Cover by no later than 12 Working Days before the commencement of each month during the Delivery Year. If a Supplier has still not lodged sufficient Credit Cover then EMRS will send the Supplier a notice of the shortfall and the Supplier will be recorded on the Credit Cover Default Register (published on the ESC website⁸) as being in 'Capacity Market Stage 1 Credit Cover Default'. The Supplier must now rectify their Credit Cover shortfall within five Working Days of receiving this notice. If they fail to do so, they will be considered in 'Capacity Market Stage 2 Credit Cover Default', their Capacity Market Supplier Charges will then be mutualised between the non-defaulting Suppliers. Any payments to Suppliers will also be suspended. A timeline of these events is given in Appendix 1 - Timeline of CM Supplier Credit Cover Requirements.

⁴ Details can be found in 'WP41 - Late Payment Procedure', <https://emrsettlement.co.uk/publications/working-practices/>

⁵ Details can be found in WP05 Supplier CM Demand Forecast, <https://emrsettlement.co.uk/publications/working-practices/>

10. When does a new Supplier need to lodge Credit Cover?

By 1 June all Suppliers are expected to provide EMRS with a forecast of demand during the Peak Demand Period⁹. If a Supplier joins the market after 1 June and consequently didn't provide EMRS with a forecast for the Peak Demand by that date (or they forecasted zero Gross Demand¹⁰ for the Peak Demand), but subsequently do supply during the Peak Demand period they will not be required to lodge Credit Cover until April, 12 Working Days prior to the start of May, which is when they will also be expected to start making CM Supplier Charge Payments based on their actual recorded Peak Demand.

All Suppliers who provided a forecast to EMRS by 1 June will receive a notice outlining their Schedule of CM Supplier Charges and Credit Cover Requirements for the upcoming CM Delivery Year. This will be sent to Suppliers by the end of July. The Suppliers will be expected to lodge sufficient Credit Cover 12 Working Days prior to the start of the CM Delivery Year which starts on 1 October.

11. What if a Supplier has provided too much Credit Cover?

Suppliers can provide as much Credit Cover as they wish, provided they meet the obligations of the scheme. Should a Supplier wish to recoup their Credit Cover, they can request to do so through the EMRS service desk (for further details see WP45: Supplier CM Credit cover¹¹). Credit Cover will be released unless:

- They are currently in Credit Cover Default;
- The amount of Credit Cover requested will put them into a negative position; or,
- They currently have payment obligations that are past the payment due date (i.e. a late payment).

12. Need more information?

For more information, please visit our website www.emrsettlement.co.uk or email us at contact@emrsettlement.co.uk.

13. Acronyms and Definitions

A full list of acronyms and definitions included within this document can be found on the EMRS website¹².

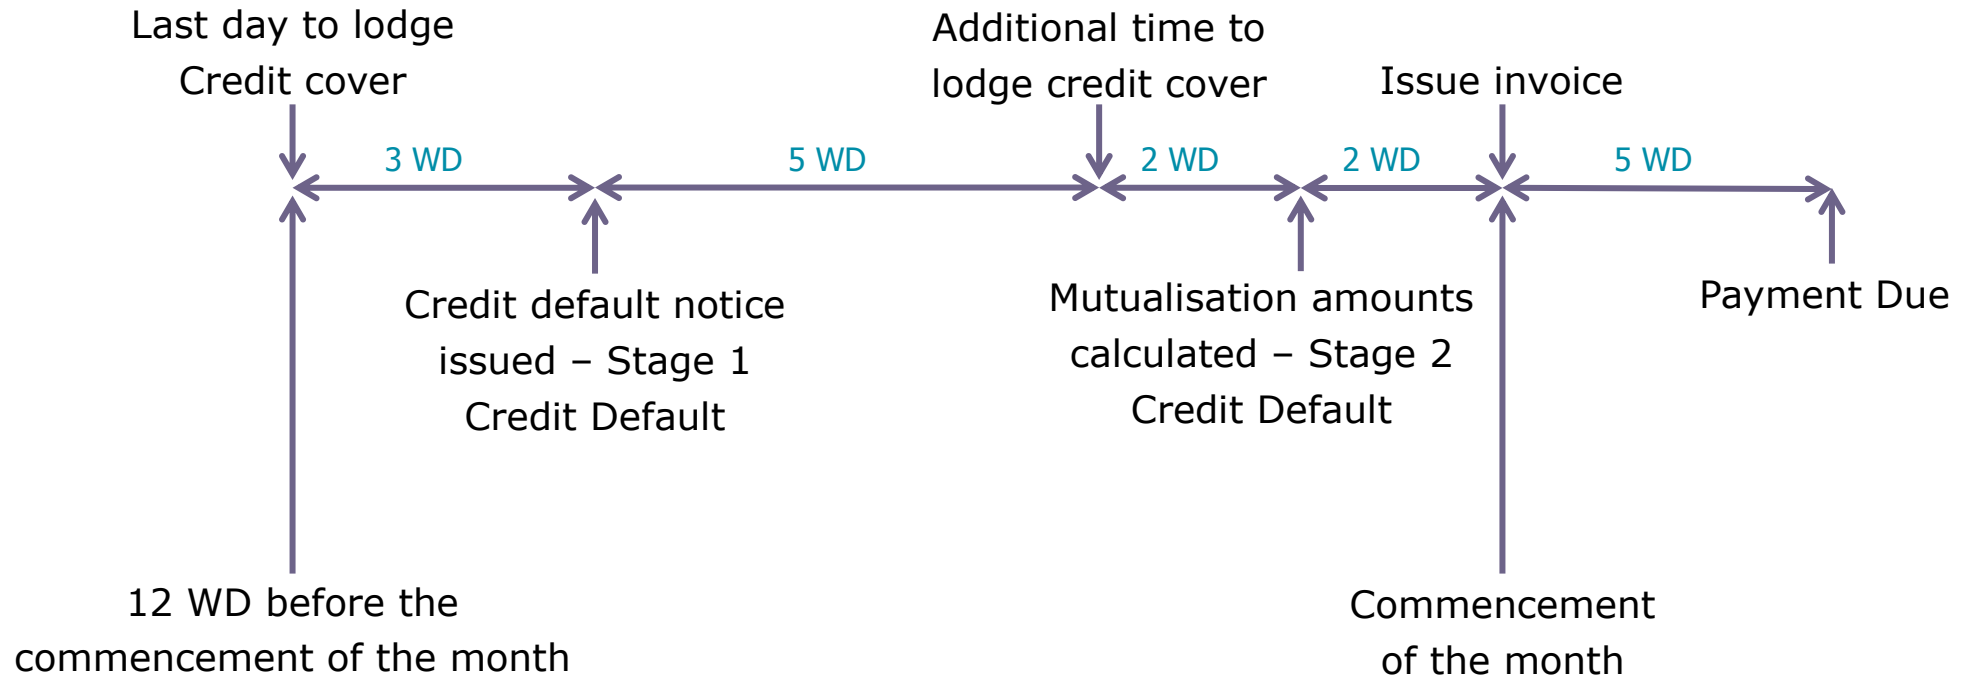

⁹ Details can be found in WP05 Supplier CM Demand Forecast, <https://emrsettlement.co.uk/publications/working-practices/>
¹⁰ Gross Demand applies from Delivery Year 2018/19 for the Capacity Market Supplier Charge from the 1 October 2018. Prior to this date Net Demand is used in the calculation of the Capacity Market Supplier Charge.

14. Appendix 1 – Timeline of Capacity Market Supplier Credit Cover

Suppliers must ensure that they have sufficient Credit Cover in place prior to the start of each month of the Delivery Year. Suppliers with insufficient Credit Cover lodged will pass into Credit Cover Default and their outstanding charges will be mutualised between non-defaulting Suppliers. The timeline of events is outlined below.
